- Secondary education - year of passing March 2019
- Percentage - 93.80%

Projects summary

▶ Covid-19 Cases in World Tracker using Spring MVC and Spring Boot

Oct 2021 — Nov 2021

- Spring MVC and Spring Boot web application to provide Covid-19 Cases across the glob.
- Project is based on Spring boot and MVC with HTML & Bootstrap template and Thymeleaf is used as server-side Java template.
- Link : https://github.com/ishanjogalekar/Covid19_Cases--Tracker-SpringBoot-Application

▶ Spring MVC - Single Page Employee registration client

Aug 2021 — Sep 2021

- Single page application project using Spring boot and REST-API.
- This application is developed using spring boot module and MySQL as database with help of some bootstrap templates and Thymeleaf as server-side Java template.
- Link: https://github.com/ishanjogalekar/Java-Programs/tree/main/SPA%20project

▶ vCOMPLAIN - Online Complaint Registration and Management System

Jan 2021 — May 2021

- V- complain is a simple complaint portal to receive and act on complaints reported by students of university ,enabling prompt actions on any issue raised by them and to avail services more effectively.
- Link: https://github.com/ishanjogalekar/Complaint-registration-software-software-engineering-project-

▶ Fall Detection module – a viable IoT project

Jan 2020 — May 2020

- NodeMCU and-MPU6050 This research is focused upon an IoT Fall detection device that works similar but is more affordable than it's predecessors.
- Link: https://github.com/ishanjogalekar/Fall-Detection-IoT-device-using-NodeMCU-and-MPU6050

▶ Farm2Home - IoT based module for smart farming

Sep 2021 — Nov 2021

- Project idea is to create an application which will act as a hub for the agricultural activities of a region.
- Currently, the agriculture sector is facing severe crisis as result of recent regulatory changes. So project is developed to creating multi-functional platform.
- I worked as frontend designer for this project.
- Link : https://github.com/saksham2001/Farm2Home

▶ Fest management using distributed database system - Java Web application

Sep 2020 — Dec 2020

- Event management system with Java JDBC and Oracle database
- Link : https://github.com/ishanjogalekar/Event-registration-management-system-DBMS-project

Certificates & Course summary

▲ Courses:

- Basics of cyber security at Udemy
- Java Development at LinkedIn
- Basics Of Web Development at Coursera
- Foundation of UI and UX by Google at Google , Coursera
- Cyber security fundamentals at ICSI
- SQL basics at Udemy
- Ethical hacking introduction at Udemy

▲ Hackathons:

- Access Denied - VIT
- Hackulus - VIT
- Code2Create - VIT
- IncubateIdea - IEEE (Robotics)
- Technica - VIT
